

My History of Watching Nature

My precious memories.
Flowers, sky, and animals makes me relax.

I have loved nature since I was a child.
I always look forward to watching nature.
The sky has the moon, stars, sunsets, rainbows, clouds and so on.
The sky changes into many different shapes.
That's very attractive.

I like flowers that bloom in spring.
Cherry blossoms, tulips, nemophila, roses, gerberas and so on.
Each flowers has a nice message.
They make me positive.

I also like animals.
I especially love jellyfish.
I feel healed when I see them.

I have loved taking pictures of nature.
They are beautiful and cute, and naturally makes me smile.
The power of nature is infinite and very interesting.
I want to love nature forever.
